;
```

```
SELECT * FROM employees;
TRUNCATE TABLE employees;
```

```
SELECT * FROM employees WHERE
FIRSTNAME BETWEEN 'a' AND 'c';
```

```
SELECT * FROM employees WHERE FIRST_NAME BETWEEN 'a' AND 'c';
```

What result will be shown?
And why?

Answer:

The query will return rows where `FirstName` starts with:

- a
- b
- c

So from your data, it will return:

- ahmed
- ali
- ayman
- bassam
- bilal

clara will NOT be returned.

Because Between works like this

```
FIRSTNAME >= 'a' AND FIRSTNAME <= 'c'
```

Oracle compares the **entire string**, not only the first character.

Example:

- 'bassam' < 'c'
- 'bilal' < 'c'
- but 'clara' > 'c'

clara can be returned when using like.

It means:

the whole string value must be alphabetically between 'a'
and 'c'.
